

Create Dry Erase Boards Using Plexiglass!

Real-Time Feedback

Visual Management is key to creating real-time feedback and a culture of continuous improvement and performance management. Organizations that are not visual and do not provide real-time feedback are analogous to someone at a bowling alley and not being able to see the pins as you bowl.

The challenge for many organizations is how to display metrics, feedback and performance indicators. We have found a readily available product that can be used to create scoreboards easily and inexpensively—Plexiglass! *Who knew this material could be used as a dry erase surface?* We use this material in our own “War Room” to display our Key Performance Indicators.

Mount plexiglass on the wall and turn your conference rooms into command center for sharing information to drive improvement.

Displaying Metrics, Feedback and Performance Indicators

White and clear are the most widely used plexiglass colors for creating scoreboards. Plexiglass will allow you to create a dry erase surface at the fraction of the cost of purchasing traditional dry erase boards, saving time and money! Create scoreboards 3 ways using Plexiglass...

- Use the Mobile In-House Sign Shop[®] to design, cut and apply your vinyl scoreboard directly to the Plexiglass
- Trim Peel & Stick Quick-Grids[®] to quickly and easily construct custom scoreboards
- Contact us to print your custom scoreboard.
