LABEL Printer

Fast, Custom Labels with Professional Results

Ideal solution for small industrial labels and bar codes

The VnM4 Label Printer is the easiest way to create professional, adhesive-backed labels and bar codes up to 4" wide from one portable, stand-alone unit.

The VnM4 supports all of your GHS label needs and is ideal for pipe markers, safety, electrical, racking labels and much more! Software is included with each system and comes with pre-designed templates and artwork that can be easily modified. Also included is our new GHS Software Package, which is all you need to comply with the latest GHS mandates.

Benefits of the VnM4 Label Printer

■ Simple

The VnM4 is easy to use—no PC needed to operate the system. Load the system, turn it on and print!

■ Portable

Desktop unit—print labels when and where you need them!

■ Economical

Compare the cost of ownership—the VnM4 is more economical compared to other systems on the market.

- Up to 70% lower in cost compared to similar systems
- Get more media with VnM4 ink.

What's included with each system?

- VnM4 Label Printer
- Keypad with USB Cable
- Power Cord
- Software/New GHS Software Package
- 1 – Black Ink Roll (984')
- 1 – 2" White Vinyl Tape Roll (150')
- 1 – 4" Yellow Vinyl Tape Roll (150')
- Editable Templates & Artwork
- Limited Lifetime Warranty

\$1,595.50

Item #: 13-1800

GHS Labeling Guide

United Nations Globally Harmonized System of Classification and Labeling of Chemicals (GHS)

GHS Label Elements

 GHS STANDARDIZED LABEL ELEMENTS OTHER GHS LABEL ELEMENTS

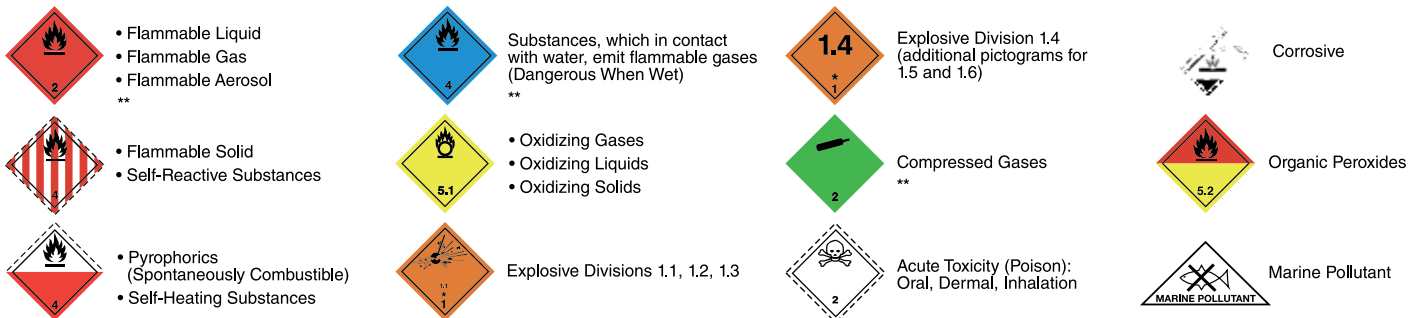

These standardized elements are not subject to variation. They should appear on the GHS label as indicated in the GHS for each hazard category or class in the system. The use of symbols, signal words, or hazard statements other than those that have been assigned to each of the GHS hazards would be contrary to harmonization.

GHS Pictograms and Hazard Classes

Transport Pictograms

* For the class on explosives, "*" is to be replaced by the indication of the compatibility group or to be left blank if explosive is the subsidiary risk.

** Symbol, number and border line may be either black or white.
